Please provide [1 group unrecovered] the certificates since this [state of affairs][a] makes a bad impression on the Swedish military authorities and above all worries these comrades. (In spite of this most of the internees are preparing for the future - they are occupied with [1 group unrecovered], are studying MARI, LEMIN, foreign languages, motor transport etc. You should regard them as being in the reserve and try through the diplomats to transfer them to the USSR; about ten of the internees proved to be scoundrels, including a DIVISION commander. They are being kept under surveillance in the camps and AKASTO is sending information about this.
